

AXIS INDEPENDENT ADVISORY

Business Valuation & Advisory

Referral resource for CPAs & advisors

THE CHALLENGE

Your clients need current calculated values for buy-sell agreements, succession, partner transitions, estate & gift planning, and internal decisions. Building an in-house valuation capability is costly for most CPA firms — and referring to a firm that does not know Puerto Rico's closely-held market can slow service or dilute the relationship.

THE SOLUTION

AXIS Independent Advisory provides CVA-credentialed Calculation Engagement capacity on a per-engagement basis — independent analysis, AXIS letterhead, bilingual service, English reports. AXIS is not a CPA firm and does not pay referral fees. Your client relationship stays yours.

HOW IT WORKS

1

You refer

Introduce AXIS by email. Scope and fee are confirmed in a quoted engagement letter before work begins.

2

AXIS engages

Documents and analysis proceed under agreed Calculation procedures. Draft to you first when you are the referring advisor.

3

Client receives

Final Calculation Report in English under AXIS letterhead, plus an analyst walkthrough of the calculation result.

SERVICES & PRICING

SERVICE	FEE	ROLE / USE CASES
Preliminary Value Assessment (PVA) Focused Path A Calculation Engagement	From \$750	Streamlined Calculated Value in a Calculation Report when narrower scope fits. Not a substitute for expanded CoV; not a Conclusion of Value.
Calculation of Value (CoV) Expanded Calculation Engagement	\$2,000–\$3,500	Buy-sell, succession, partner transitions, estate & gift planning, internal decisions — broader agreed scope and depth.
Ongoing Valuation Support (OVS) Continuity / refresh	Quoted	For clients with a prior AXIS CoV. Keep the number current as the business and purpose evolve. Not a productized annual subscription.
Conclusion of Value / formal opinion	Referred	Litigation, regulatory filings, financing requiring a formal opinion, M&A / complex structures — referred to a trusted colleague.

Both PVA and CoV are **Calculation Engagements** that differ by agreed scope, extent, depth, and procedures. Each delivers a **Calculated Value** in a **Calculation Report**. Unsure of fit? Use the free Valuation Fit Check (screener) — a qualification tool, not a valuation.

WHY AXIS

✓ CVA-credentialed

Engagements developed with reference to NACVA Professional Standards. The CVA credential is accredited by both NCCA and ANAB.

✓ Puerto Rico focus

Closely-held businesses, local lending norms, and family-business dynamics; bilingual service; reports in English.

✓ Independent by design

No brokerage commissions, no success fees, no referral fees. AXIS is not a CPA firm — analysis stays independent.

✓ Clear partner process

Quoted fees before work begins; draft to referring advisor when appropriate; fixed ranges published for PVA and CoV.
